Letters to the Editor

- Practical determination of the spatial correlation function
Blanchard, A., Alimi, J.-M. L1
- NGC 2214: A merging binary star cluster in the Large Magellanic Cloud?
Bhatia, R.K., MacGillivray, H.T. L5
- CO emission in NGC 4438: A case for tidal stripping?
Combes, F., Dupraz, C., Casoli, F., Pagani, L. L9
- A brown dwarf companion as an explanation of the asymmetry in the β Pictoris disk
Whitmire, D.P., Matese, J.J., Tomley, L.J. L13
- A dark matter gravitational accretion scenario for E galaxy activity
Valentijn, E.A. L17
- Speckle masking observations of η Carinae
Hofmann, K.-H., Weigelt, G. L21
- Detection of CH and CH⁺ in a high latitude molecular cloud
de Vries, C.P., van Dishoeck, E.F. L23
- LHG 87, a new low-mass eclipsing X-ray binary in the LMC
Pakull, M.W., Beuermann, K., van der Klis, M., van Paradijs, J. L27

Cosmology

- Coupling of modes in Newtonian cosmology and the formation of primordial objects
Mücket, J.P., Haubold, H.J., Müller, V., Gottlöber, S., Mathai, A.M. 211

Extragalactic astronomy

- Five years monitoring of extragalactic radio sources. II. Quiescent spectra and the evolution of outbursts
Valtaoja, E., Haarala, S., Lehto, H., Valtaoja, L., Valtonen, M., Moiseev, I.G., Nesterov, N.S., Salonen, E., Teräsanta, H., Urpo, S., Tiuri, M. 1
- The H I-properties of bright southern galaxies
Becker, R., Mebold, U., Reif, K., van Woerden, H. 21
- H I observations of the massive spiral galaxy NGC 5635
Saglia R.P., Sancisi, R. 28

- The radio continuum emission of bright galaxies with Liner, H II region-like, and Seyfert nuclei
Giuricin, G., Mardirossian, F., Mezzetti, M. 39
- A molecular ring in the nucleus of the barred spiral galaxy NGC 1097
Gerin, M., Nakai, N., Combes, F. 44
- Three-color surface photometry of a selected sample of early-type galaxies. II. Color gradients
Vader, J.P., Vigroux, L., Lachièze-Rey, M., Souwiron, J. 217
- Brackett γ observations and extinction in giant H II regions in M 101
Skillman, E.D., Israel, F.P. 226
- Jet-like morphology of ionized gas due to a UV-radiation cone
Schulz, H. 233
- H I observations of galaxies in the Kraan-Korteweg-Tammann catalogue of nearby galaxies. III. Global parameters of the galaxies
Huchtmeier, W.K., Richter, O.-G. 237
- New active galactic nuclei from the IRAS deep fields
Keel, W.C., de Grijs, M.H.K., Miley, G.K. 250
- Extranuclear [O III] in IR excess Seyfert galaxies
van Heerde, G.M. 255
- Gas dynamics in interacting disc galaxies; fuelling of nuclei by induced bars
Noguchi, M. 259
- A bimodal model for the galaxy luminosity function
Schaeffer, R., Silk, J. 273
- Infrared spectroscopy of [Fe II], H₂ and H line emission in galactic nuclei
Moorwood, A.F.M., Oliva, E. 278

Galactic structure and dynamics

- Cosmic gamma rays and the mass of gas in the Galaxy
Richardson, K.M., Wolfendale, A.W. 289

Stellar clusters and associations

- Evolutionary constraints for young stellar clusters. II. The case of NGC 1866
Brocato, E., Castellani, V. 293

Formation, structure and evolution of stars

IRAS low-resolution spectra of cool carbon stars. II. Stars with thin circumstellar shells

Willems, F.J. 51

IRAS low-resolution spectra of cool carbon stars. III. Stars with thick circumstellar shells

Willems, F.J. 65

Comparative study of evolutionary tracks of massive stars

de Loore, C. 71

Analysis of the optical light curve of LMC X-3

Kuiper, L., van Paradijs, J., van der Klis, M. 79

Optical and infrared observations of IRC + 10216 and related objects. Dust shells modelling

Le Bertre, T. 85

Molecular distributions in the GGD 12-15 region

Heaton, B.D., Andersson, M., Dent, W.R.F., Little, L.T. 99

Coupling of an accretion disk corona with a weakly magnetic neutron star and a possible relation with quasi-periodic oscillations

Stollman, G.M., Kuperus, M. 104

Mass segregation and formation of X-ray sources in globular clusters

Verbunt, F., Meylan, G. 297

Variable C: an S Doradus-type variable in M 33

Humphreys, R.M., Leitherer, C., Stahl, O., Wolf, B., Zickgraf, F.-J. 306

100 TeV gamma radiation from SN 1987 A as a probe of pulsar acceleration

Berezinsky, V.S., Castagnoli, C., Navarra, G. 317

Gravitational wave background from a sample of 330+4 pulsars

Barone, F., Milano, L., Pinto, I., Russo, G. 322

Radial velocity measurements of a sample of northern metal-deficient stars

Jasniewicz, G., Mayor, M. 329

Stellar atmospheres

Line variations in the ultra-violet spectrum of the Ap-Si star HD 25823

Artru, M.-C., Freire-Ferrero, R. 111

IUE observations of high galactic latitude F supergiants HD 161796 and HD 187885

Parthasarathy, M., Pottasch, S.R., Wamsteker, W. 117

Abundances of the rare-earth elements in the giant Am star HR 178

van 't Veer-Menneret, C., Burkhart, C., Coupry, M.F. 123

Erratum: The rapidly rotating spotted red dwarf flare star Gliese 890

Pettersen, B.R., Lambert, D.L., Tomkin, J., Sandmann, W.H., Huang, L. 210

Stellar integrated fluxes for 216 stars in the wavelength range 380 nm-900 nm

Petford, A.D., Blackwell, D.E., Booth, A.J., Haddock, D.J., Leggett, S.K., Mountain, C.M., Selby, M.J., Arribas, S. 341

51 Ophiuchi (B9.5Ve): A Be star in the class of β Pictoris stars?

Waters, L.B.F.M., Coté, J., Geballe, T.R. 348

The relation between rotational velocity and mass-loss for massive stars

Nieuwenhuijzen, H., de Jager, C. 355

Dust emission from symbiotic stars: an interpretation of IRAS observations

Anandarao, B.G., Taylor, A.R., Pottasch, S.R. 361

Diffuse matter in space (including HII regions and planetary nebulae)

The intrinsic profiles of five diffuse interstellar bands

Westerlund, B.E., Krelowski, J. 134

(RN) Remarkable candidates for the carrier of the diffuse interstellar bands: C_{60}^+ and other polyhedral carbon ions

Léger, A., d'Hendecourt, L., Verstraete, L., Schmidt, W. 145

Scattered light between 2 and 13 arcmin from ζ Orionis in the 1200 to 3000 Å wavelength range

de Boer, K.S., Kuss, C. 149

Ammonia towards IRAS sources in the Orion and Cepheus clouds

Wouterloot, J.G.A., Walmsley, C.M., Henkel, C. 367

The Sun

Hydrodynamic Green's functions for atmospheric oscillations

Brandenburg, A. 154

Differential cloud models for solar velocity field measurements

Mein, P., Mein, N. 162

Solar photospheric abundance of iridium

Youssef, N.H., Khalil, N.M. 378

Comparison of the differential rotation laws and meridional motions determined from sunspot positions taken from the Greenwich Photoheliographic Results, the drawings of G. Spörer, and the Kanzelhöhe data

Balthasar, H., Fangmeier, E. 381

The solar system

Comparison of Bretagnon's VSOP 82 theory with observations of Uranus

Gomes, R.S., Ferraz-Mello, S. 170

Water vapor and hydroxyl distributions in the inner coma of comet P/Halley measured by the Vega 2 three-channel spectrometer TKS

Krasnopolsky, V.A., Tkachuk, A.Yu., Moreels, G., Gogoshev, M. 175

The origin of the ions at 28 million km upstream of comet P/Halley

Konno, I. 385

Celestial mechanics and astrometry

Statistical analysis of the errors in visual double star observations. II. "New-generation" observers

Pannunzio, R., Massone, G., Morbidelli, R. 388

Physical and chemical processes

Some properties of the solutions of a non-linear boundary value problem for a force-free field in an infinite region of space. I. Energy estimates

Aly, J.J. 183

(RN) Effective collision strengths for fine-structure forbidden transitions in the $3p^3$ configuration of K v

Butler, K., Zeippen, C.J., Le Bourlot, J. 189

Instruments, data processing, and computational methods

Continuously movable telescopes for optical interferometry

Vivekanand, M., Morris, D., Downes, D. 195

High precision photometry: the electron bombarded diode approach

Cuby, J.G., Baudrand, J., Chevreton, M. 203

(RN) Precautions to take when using the IRAS-LRS catalogue: spurious $12.8\ \mu\text{m}$ [Ne II] line and other features

de Muizon, M., Cox, P., Lequeux, J. 207

Radio-holographic reflector measurement of the 30-m millimeter radio telescope at 22 GHz with a cosmic signal source

Morris, D., Baars, J.W.M., Hein, H., Steppe, H., Thum, C., Wohlleben, R. 399
